

Rest Rooms Have Large Attendance

Many Working Girls From Nearby Factories Call Daily During Lunch Hour.

The reopening and refurnishing of the Y. W. C. A. rest room at 1301 East Main Street, is a valuable addition to the work of this association. These rest rooms were opened something like three years ago, with an average daily attendance of ten or fifteen girls daily. Now the rest room sees at least seventy or seventy-five girls daily who come for meals.

The work of the Y. W. C. A. has grown extensively along this line in the past year or two until now the association is reaching out its arms and assisting those who will not come to the association. Many of the girls, especially those employed in the factories in the neighborhood of Twentieth and Main Streets, are unable to come to the Y. W. C. A., and hence the association has gone to them.

To meet this demand in that neighborhood, the Y. W. C. A. has secured a rest room, and this has been in successful operation for some time. The room is located on the second floor of a building midway between Twentieth and Twenty-second Streets on Main Street. At least sixty girls call at this rest room daily between the hours of 12 and 2 o'clock. The lunch period for the girls who work in the factories here is not long, and hence those who operate the rest room

and lunch counter must work fast. So adept have they become that it requires but a few minutes for a girl to enter and secure her lunch. Many of the girls bring their own lunches and only purchase coffee, tea or milk. The cost of the various items in the menu has been placed at actual cost, and those who frequent the rest room and lunch counter are able to purchase a substantial meal at a remarkably low cost.

It was possible to open this rest room through the generosity of a woman who pays the rent and of the factory owners in the vicinity who paid for the installation of the equipment. Better equipment, however, is demanded, and friends of the work will be asked to assist in securing it. There is hardly any doubt but that the necessary equipment will be secured when the work is understood and when the objects to be attained are explained.

Some of the best men and women in the city are actively engaged in the work, and the results during the past year have been exceptionally good. Those who are most actively engaged, however, state that they intend to make 1916 the most valuable year in the history of the local association, and have already laid their plans for extensions of the work in several directions.

Only Professional Soldiers.

PARIS, April 1.—The company of Australian siege artillery which is reported to have taken part in the battle of Verdun is the so-called "garrison artillery" of Australia, the only professional soldiers in the Commonwealth. There were 630 of them stationed in Australia during peace time—6 feet 2 1/2 inches.
